

Notification of Construction Works at Gunsreen Quay w/c 2nd Nov 2020 for approx. 8 weeks.

As part of the Neart na Gaoithe Operations & Maintenance facility proposed at Eyemouth Harbour, construction will start on a new fuel facility and port waste reception located into the bank alongside Gunsreen Quay, south of the Harbour Office Building.

The works will involve some large plant and equipment. In preparation for these works, EHT will be fencing off the area and access will be restricted in the immediate vicinity.

Works are expected to last until the end of the year and access to the areas shown and some parking restrictions may be in force throughout this time.

- Additional car parking is available in the SBC long stay car park at Gunsreenhill at the top of the steps.
- Area for net repair and gear will remain along Gunsreen Quay.
- Road access along to the turning circle will remain clear.

We hope there will be minimal disruption whilst these vital works are carried out and thank you for your understanding and co-operation.
